About

I'm a Computer Science student exploring the intersection of technology, creativity, and real-world problem-solving.

Currently learning Java, I'm curious about AI and emerging technologies, and how we can make tech more intuitive, engaging, and fun. I believe technology should be about more than writing code—it should be about turning ideas into meaningful experiences and practical solutions.

Always learning, experimenting, and looking for new ways to think beyond the conventional.

About

I am a B.Tech student passionate about technology and software development. I am learning Java programming and developing my problem-solving skills. I am eager to explore new technologies, work on practical projects, and continuously improve my coding skills as I work toward becoming a Software Developer.
